

Money, money, money. And it's yours for the taking.

One of the best things about all of our software solutions has to be the inclusion of advertising. The EstateVue ad program allows the purchaser to recoup all out of pocket monthly expenses and in most cases, the opportunity exists to turn your EV advertising into more income.

Advertising is custom tailored to your location both geographically and demographically. Our ad team will help you formulate the perfect ad rotation, so that listings are never diluted. Ads work as screensavers when the kiosk is not in use and operate as pop ups when the kiosk is in use.

The most unique feature of our kiosk ads is the direct-to-advertiser contact button which allows kiosk users to get directly in touch with an advertiser via email.
